

HIMANSHU NAINWAL

Java Spring Boot Backend Developer

 +91-6397499593  himanshunainwal0@gmail.com  [LinkedIn](#)  [GitHub](#)

Professional Summary

Backend Software Engineer with 1.5+ years of experience building and integrating scalable REST APIs, microservices, and third-party system integrations (QuickBooks, GrassBlade xAPI/LRS, AWS S3) using Java, Spring Boot, PostgreSQL, and Redis. Skilled in designing secure authentication flows (JWT), custom platform architecture, browser automation (Selenium), and workflow automation (Make.com), with working exposure to React-based frontend integration.

Technical Skills

Languages: Java, JavaScript(Basic)

Frameworks: Spring Boot, Spring Cloud, Hibernate, JPA, **Microservices**, Django, Node.js, Express.js

Frontend: React (integration & consumption of backend APIs)

Databases: MySQL, PostgreSQL, **ChromaDB** (Vector Database), **Redis**

Message Brokers: Apache Kafka, RabbitMQ

Integrations & Automation: REST APIs, xAPI/LRS, QuickBooks SDK, AWS S3, Selenium, Make.com

Cloud & DevOps: Docker, Jenkins, CI/CD Pipelines

Tools: Git, Maven, Gradle, IntelliJ IDEA, VS Code, Postman, Swagger

Professional Experience

Oodles Technologies Pvt. Ltd.

Associate Consultant – Development

Nov 2024 – Present

Gurugram, Haryana

- Designed and developed backend microservices using **Java, Spring Boot, and REST APIs** across multiple client platforms, including LMS systems, quoting/e-commerce tools, and internal automation utilities.
- Integrated third-party platforms and payment/accounting systems, including **QuickBooks Online, GrassBlade xAPI/LRS, and AWS S3**, enabling secure data exchange, real-time accounting sync, and scalable content delivery.
- Built secure, token-based authentication and session flows (**JWT, xAPI Key/Secret**) supporting cross-service communication between LMS platforms, SCORM players, and external Learning Record Stores.
- Developed a web-scraping and browser-automation service using **Selenium**, and built scenario-based integration pipelines using **Make.com** to connect external data sources with internal applications.
- Built backend services integrated with a **React** frontend to support product catalog browsing and quote-request workflows for external clients.
- Collaborated with QA and product teams in Agile delivery, implementing role-based access and multi-tenant data models (parent/child/non-residing-parent hierarchies, enrollment-based course packages) to support complex registration and subscription workflows.

STL Digital

Graduate Engineer Trainee

Oct 2023 – Jun 2024

Pune, Maharashtra

- Revamped an **e-Commerce** application using **Spring Boot, React, and MySQL**, enhancing transaction throughput and data flow by **25%**.
- Implemented a **microservice-based architecture** with **JWT authentication**, boosting scalability and strengthening security compliance by **40%**.
- Redesigned **UI workflows** for modules such as Login, Signup, and Product Details, improving user navigation by **30%**.

Key Projects

CareH – Learning Management System (LMS) | *Java, Spring Boot, PostgreSQL/MySQL, AWS S3, GrassBlade xAPI/LRS*

- Built child/parent/non-residing-parent registration workflows, assigning a unique **Enrollment ID** per user and mapping enrollments to configurable **course packages**; used **AWS S3** to store course content and cover images.
- Generated a unique **Learner ID** per user and integrated with the **GrassBlade LRS**, passing learner details, xAPI endpoint, and Key/Secret auth into the SCORM launch configuration to capture and retrieve xAPI statements (Experienced, Answered, Completed, Progress).
- Designed an **attendance management system** that logs attendance on question responses, notifies parents daily, suppresses alerts during approved leave, and triggers an escalation message after 7 consecutive absent days.

Itinera – QuickBooks Online Estimate Comparison | *Java, Spring Boot, QuickBooks SDK, REST APIs*

- Integrated **QuickBooks Online** to fetch client accounts and retrieve all associated product estimates per account.
- Built backend logic to generate and manage **multiple estimates per product across pipeline stages**, enabling side-by-side comparison for client decision-making.
